

## NPU K

The data presented in this fact sheet come from the Decennial Census, the American Community Survey, the Longitudinal Employer-Household Dynamics Program, and the Atlanta Police Department.

Neighborhood Nexus has developed statistical areas that describe Neighborhood Planning Units (NPUs) using U.S. Census geographies to ensure the most accurate possible data. Please see the end of this report for more details about the data and Neighborhood Nexus.

The map to the right shows Atlanta and its NPUs. The highlighted portion shows the location of the NPU covered in this fact sheet.

#### **About Neighborhood Planning Units:**

The Neighborhood Planning Unit system has its origins in the 1974 Citizen Involvement Ordinance, which created these bodies "for engaging in comprehensive planning matters affecting the livability of neighborhoods." Atlanta is divided into 25 NPUs, each of which is comprised of a set of contiguous neighborhoods. Each NPU holds monthly meetings at which residents have the opportunity to provide input on matter such as variances, zoning issues, and long-term planning.

#### **About Neighborhood Nexus:**

Neighborhood Nexus, powered by the Atlanta Regional Commission, the Community Foundation of Greater Atlanta, Metro Atlanta Chamber, and United Way of Greater Atlanta, is a community intelligence system providing over six thousand data variables from the Census and many other sources at different levels of geography. Bundled state-of-the-art visualization tools help users to understand and analyze these data.

Our goal at Neighborhood Nexus is to support a network of community leaders and residents, government and businesses, advocates and service providers with the information, tools and expertise to make data-driven decisions, help meet challenges, leverage assets, and create new opportunities for policy intervention in community problems.

Neighborhood Nexus supports research, analysis, and community engagement. Our partners use these data and tools to examine past and current socioeconomic and demographic patterns; assess correlations between the equity, health and climate of communities; identify and develop benchmarking metrics; and in so doing make better community decisions.
